Tools you can use:
- glue, tape, scissors, ruler, any writing instruments (pen, pencil, marker, etc.)

The Challenge:
Construct using only paper clips and paper as your materials. You may use any of the tools listed above. The paper clips and paper can only be part of one design. So you cannot make a paper clip chain, take it apart and use the same paper clips to design another object. Same goes for the paper, if you cut one of the sheets you cannot add more sheets. You may choose to create one object or several using the materials.

Outcomes:
- Was it your goal to create one design or did you decide to make multiple items?
- Where you successful in your results?
- Why? Why not? What could have been done differently?

Observations:
- How does the thickness of your paper affect design?
- What size/weight are your paper clips?
